Films are cultural artifacts created by specific cultures. They reflect those cultures, and, in turn, affect them. Film is considered to be an important art form, a source of popular entertainment, and a powerful medium for educating—or indoctrinating—citizens. The visual basis of film gives it a universal power of communication. Some films have become popular worldwide attractions through the use of dubbing or subtitles to translate the dialog into other languages. The individual images that make up a film are called frames. In the projection of traditional celluloid films, a rotating shutter causes intervals of darkness as each frame, in turn, is moved into position to be projected, but the viewer does not notice the interruptions because of an effect known as persistence of vision, whereby the eye retains a visual image for a fraction of a second after its source disappears. The perception of motion is partly due to a psychological effect called the phi phenomenon.

1960s and later : The decades following the decline of the studio system in the 1960s saw changes in the production and style of film. Various New Wave movements including the French New Wave, Indian New Wave, Japanese New Wave, and New Hollywood and the rise of film-school-educated independent filmmakers contributed to the changes the medium experienced in the latter half of the 20th century. Digital technology has been the driving force for change throughout the 1990s and into the 2000s. Digital 3D projection largely replaced earlier problem-prone 3D film systems and has become popular in the early 2010s.citation needed

Although San Francisco County began to allow cinemas to reopen on October 7, the majority of cinemas remain closed due to a boycott by the National Association of Theatre Owners of CaliforniaNevada, due to local guidelines prohibiting the sale of concessions. The group stated that this restriction makes it economically impossible for our members to reopen and significantly limits the moviegoing experience for our audiences.191 Cinemark announced later that month that it would reopen selected cinemas in the Bay Area and

Santa Clara County, operating in compliance with the concessions prohibition.192 On October 17, New York announced that it will allow cinemas outside New York City and situated in counties with a 14-day average of cases below 2% to reopen on October 23, at a maximum capacity of 50 patrons per-screen.193 On November 9, 2020, Regal announced that the selected California and New York locations it had recently reopened would close indefinitely November 12.194 The same day, the share prices of AMC, Cinemark, and Disney rose on early reports by Pfizer on the efficacy of a COVID-19 vaccine in development by the company and BioNTech.195196
